Complaint Date: 2026-08-06

Quantity Affected: 45 units

Detailed Complaint Description:

During routine receiving inspection at our distribution center, we identified 45 blister packs from this batch with damaged foil seals. The foil backing on the affected blisters is torn or incompletely sealed, potentially exposing tablets to moisture. No product discoloration or physical tablet damage was observed on visual inspection. Affected units have been segregated and are being held for your disposition instructions. Remaining stock from this batch (total 2,400 units received) has been placed on hold pending your investigation outcome.
